

## OSP inundated with grant proposals under 'pro-active development stance'

Within a recent three-day period, the Office of Sponsored Programs (OSP) processed nine research and training proposals requesting \$1.7 million from outside sponsors. That level of proposal processing establishes a new record for the College, said OSP Director Stan Matelski.

The number of proposals went up 33 percent in the last full academic year, from 33 proposals submitted in 1983-84 to 44 in 1984-85. And, said Matelski, OSP has already processed 46 proposals in the first 7 months of the 1985-86 academic year.

"I'm happy about this because it lets us know that the program is working," said Matelski. The "program" encompasses the intensified outreach activities begun during the past year, starting with the unit's change in name and focus.

OSP grew out of the former Office of Sponsored Research in February 1985. At that time it took on not only proposals for research but also those for training programs, curriculum development, technical assistance, credit institutes and others.

"We are a service unit for the entire community—the College, KDES, MSSD and SPS," said Matelski. "There are so many needs here. We have both faculty and staff looking for money for projects. OSP is the match-maker, if you will. We're simultaneously identifying possible sources of support and trying to make the match."

As part of OSP's role as match-maker, Matelski has stepped up outreach efforts. A new monthly newsletter informs the campus community about opportunities for grants and con-

tracts. A new brochure describes proposal preparation.

Matelski, in his aim to foster a "pro-active development stance," meets with faculty, staff and other project directors; assists in proposal development, budget preparation and negotiations; and accompanies faculty and staff proposal writers to see project officers at various agencies.

"Making contacts is essential," said Matelski. "It's a key element. Federal program officers give valuable advice to proposal writers—agency priorities, probabilities of funding, future trends and budget information. It's well worth the trip downtown."

Matelski has also included the Sponsored Programs Information Network (SPIN) of the State University of New York in OSP's offerings to the campus community. Through SPIN, campus proposal writers can visit OSP and use the computer database to identify potential sponsors.

OSP has expanded its search not only for federal and state support monies but also for funding from foundations, nonprofit entities and associations for specific projects.

But what about the effects of the Gramm-Rudman-Hollings deficit reduction act on sponsored research? Matelski said he is not going to let it worry him. He recalled similar situations that occurred when he served as assistant director of the Office of Contracts and Grants at the University of Maryland and, most recently, as director of Research, Grants and Contracts Services at American University.

"It created an air of pessimism among faculty nationwide, so faculty

*continued on page 2*

Director of Computer Services Kevin Casey, right, discusses the merits of the new VAX 8600 computer with Assistant Director Robert Herbold.

## \$500,000 DEC grant lends support for expanding College's VAX system

A recent award of a \$500,000 equipment grant from the Digital Equipment Corporation (DEC) has provided Gallaudet with partial support for a computer system that is roughly three times as powerful as the College's current mainframe computer, the DEC-1090.

According to Kevin Casey, director of Computer Services, the new VAX 8600 computer is also more cost-effective—at about 60 percent of the cost for equipment and maintenance for the DEC-10—and is more reliable. Installed during the fall semester, the VAX 8600 typically provides 30 days of continuous operation compared with about 7 days for the DEC-10.

The DEC-10 has been the College's mainframe computer for 16 years, said Casey. It has provided computer support for instructional and research purposes and for administrative and student records.

Nearly four years ago, Computer Services added a mid-sized VAX computer, described by Casey as "Gallaudet's first of the next generation of mid-sized computing equipment." A second VAX was introduced three years ago as part of a "migration path" of campus computing to the more sophisticated equipment.

The VAX 8600 and several MicroVAXes—purchased with the help of the DEC grant—join the existing VAX "cluster" housed in the Edward Miner Gallaudet Building. The MicroVAXes, which are compact desktop computers, will be placed in several locations on campus and will permit the exchange of data, print files and electronic mail in a communications network.

With the new equipment, said Casey, the College has "enough com-

putational resources to migrate the remaining DEC-10 computer applications to the VAX cluster." Gallaudet's DEC-10 will eventually be phased out.

"People who have used the DEC-10 will find it relatively easy to adapt to the VAX environment," said John Millikin, manager of User Services. He compared the transition to an American learning the British form of English as opposed to having to learn French.

"The grant is a very significant event for Gallaudet," said Casey. "Certainly it's an honor for Gallaudet to receive the award. The VAX cluster provides us with a complete migration path to move the campus to more cost-effective computing."

Casey said that DEC conducts an annual competitive screening for grant awards. DEC historically has looked more favorably on schools that have engineering programs. "DEC has recognized the special role of Gallaudet and the importance of our computer resources in the education of hearing impaired people," he said.

## Britain's Lady Annaly & daughters visit here

The Lady Annaly, sponsor of two major projects in London serving hearing impaired persons, visited the Kendall Green and Northwest campuses last week accompanied by her hearing impaired daughter and step-daughter. In addition to attending a variety of meetings and luncheons with campus officials, the wife of The Baron Annaly observed several classes at KDES and MSSD. Her week-long visit was coordinated by Susan Watson in the Visitors Center.

President Jerry C. Lee presents his second annual address to students on March 4 in the cafeteria. Students had the opportunity to ask questions after the address.

## Gallaudet to offer counseling degree

Beginning in the fall semester, the Department of Counseling in the School of Education and Human Services will offer a master's degree training program in mental health counseling with hearing impaired people.

According to Patrick Brice, director of the mental health counseling program, there is presently no formal program in the country that trains both hearing and hearing impaired counselors to work with hearing impaired people.

The training program will be comprised of core courses that are basic to all counselor training programs, nine hours of electives, two semesters of practicum placement and one semester of full-time internship in a mental health setting. Both practica will be in the Washington, D.C. area; internships may be at sites around the country.

In addition, one summer semester will be necessary to complete all of the required courses. Some of the courses can be taken through the Consortium of Universities of the Washington Metropolitan Area.

The curriculum is designed to prepare graduates for work in a variety of mental health settings, including community agencies, social service agencies and psychiatric facilities.

Although requirements for certification as a mental health counselor vary from state to state, said Dr. Brice, there appears to be a rise in legislation mandating the certification of master's level counselors and making them eligible, under supervision, to receive third party payment.

Applicants to the program should have a basic educational foundation in psychology, sociology or social work, plus at least one undergraduate or graduate course in abnormal psychology. The usual requirements for application to graduate programs must also be met. Preference will be given to individuals who have worked with hearing impaired people in mental health settings.

Currently there is no money available for student support, but grant monies are being sought to help pay student tuition and fees.

Gallaudet College is an equal opportunity employer/education institution. Programs and services offered by Gallaudet College receive substantial financial support from the U.S. Department of Education.

Donna Cantor, left, and Eleanor Galloway, Department of Television, Film and Photography, provided information about their courses to students during the March 5 Careerathon sponsored by the Career Center.

## OSP program working, says Matelski

*continued from page 1*

members weren't applying in the numbers they were before the cuts. But those who were applying had a better chance. So rather than being discouraged, we're forging ahead, trying to generate as many proposals as we can.

"There are going to be cutbacks, true. Nobody knows for sure what's going to happen. I try to be realistic, but not pessimistic. We're also looking for alternate sources of funding—foundations, corporations and associations."

He points to a possible major award, one of the largest ever to go to a deaf faculty member. Developed by Dr. Harvey Goodstein of the Department of Mathematics and Computer Sciences, the project is titled "Summer Institute in Mathematics and Computer Science for Pre-College Teachers of the Hearing Impaired." It may receive \$322,000 from the National Science Foundation over two years, plus continuation funding of \$225,000 for an additional period. The project is presently under

review by the D.C. Office of Intergovernmental Relations.

The proposed and awarded projects in recent months are diverse. One, developed by Dr. Woody Woodward of the Gallaudet Research Institute (GRI), will record Black Southern signing, which resembles earlier forms of American Sign Language. Another, by Dr. Jim Achtzehn of the School of Education and Human Services, is titled "Sexual Abuse of School-Age Hearing Impaired Children." And still another, by Dr. Kathleen Shaver of the GRI, is titled "Genetic Diseases Testing and Counseling."

Being a matchmaker can often require long hours, but Matelski and his two staff members, Lucy Trivelli and Lola Wanner, find it exciting too. "Gallaudet strongly supports the enhancement of faculty and staff opportunities for creative and scholarly research," Matelski said, "and that's as it should be. It's a central component of the College's mission."

## Among Ourselves

Sociology and social work professor Yerker Andersson, president of the World Federation of the Deaf, gave the opening address at the First Summit on Deafness held in Quebec last month. Among those attending the meeting were many Gallaudet graduates.

Bernard Bragg, artist in residence, will be a guest at a banquet April 24 in New Orleans sponsored by the Mississippi Chapter of Gallaudet College Alumni Association.

English professor Trent Batson, director of English Natural Form Instruction (ENFI), and Joy Peyton, ENFI co-director from the Center for Applied Linguistics, will present a talk and demonstration of the Gallaudet Classroom Network at National Computing Conference June 4-6 in San Diego.

David Snyder, associate professor of physics, will give a workshop entitled "Laboratory Interfacing the IBM-PC" at both the May national meeting of

the American Association of Physics Teachers (AAPT), to be held at Georgia Institute of Technology, and at the summer meeting of the AAPT, to be held at Ohio State University.

Len Kelly of IDEC recently completed his doctoral dissertation at Catholic University on how a writer's concern for the correctness of English grammar can interrupt the composition process. A comparison between Gallaudet freshmen writers and a sample of unskilled college writers with normal hearing indicated that the deaf writers were relatively less obstructed by excessive attention to grammatical correctness. Several copies of the dissertation are available for borrowing. Contact Kelly on x5817.

Katherine Seelman of the Gallaudet Research Institute served on a panel on disability management entitled "Economics of Disability II: Forum on Disability Policy" sponsored by the National Institute of Handicapped Research and held last month in the District.

## Magazine features article on EPOC

Gallaudet's Experiential Programs Off Campus (EPOC) was featured in the January-February issue of the *Forum for Liberal Education*, published by the Association of American Colleges.

Within the issue's theme of "Strengthening the Connection Between Campus and Business," the article on Gallaudet describes the two key efforts of EPOC: educating business supervisors and colleagues about working with hearing impaired students, and helping students derive maximum benefit from their work experiences.

The article, subtitled "Educating the Office about the Student," notes EPOC's 24-page supervisor's manual, short brochures, workshops for both supervisors and students, on-site training for office staff and "debriefing" sessions for students.

The EPOC success story was 1 of 11 such college programs across the U.S. selected for inclusion in the magazine. The 11 were chosen from 120 submitted for editorial consideration.

In a letter to EPOC Director Dr. Anne B. Nissen, *Forum* editor Sherry Levy-Reiner said, "I appreciate being able to include your program; I consider it a fine example of campus-business cooperation."

## TV descramblers zap new decoder

Certain cable TV descrambling systems are interfering with the performance of the new TeleCaption II decoders, according to the National Captioning Institute (NCI).

Many pay-TV cable companies scramble their program signals, requiring viewers to use a descrambling device provided by the cable company. NCI has found that descramblers manufactured by two companies—Jerrold and Regency—prevent TeleCaption II from decoding captions for closed-captioned programs.

NCI is working with the two companies to resolve the problem, and it will inform TeleCaption II owners of the results.

NCI requests that persons experiencing problems with the new decoder inform both NCI and their local cable TV company. NCI's telephone number is 998-2400 (V/TDD).

## Committee seeks award candidates

Nominations for the Wallace D. Edington Student Volunteer Award are being accepted by members of the Volunteer Awards selection committee.

This award was established in 1977 by the Gallaudet College Alumni Association in memory of Edington, a 1915 graduate who was a volunteer in the Alumni Office from 1972 to 1979.

Candidates must be full-time students who volunteer a minimum of two hours per week and have completed 32 hours of volunteer work at the time of nomination.

The award will be presented at the annual spring recognition dinner April 22. For more information and nomination forms, contact Terri Baker Fantasia at the National Information Center on Deafness, x5109.

Erica Levenhagen, left, was among 19 DOSS staff members to receive diplomas March 7 from the Campus Law Enforcement Academy of D.C. Marty Tapscott, right, is assistant chief of the D.C. Metropolitan Police. Sgt. Bernard Holt, center, is DOSS's training coordinator.

## New ENFI computer network system makes study easier and boosts skills

The computer age appears to be serving up all kinds of never-before-imagined possibilities—such as a mode of writing English that hearing impaired students reportedly “take to with eagerness.”

According to English professor Trent Batson, students are excited about courses taught through a computer network system called English Natural Form Instruction (ENFI), he said, “and they do markedly better in their courses than do students in regular classrooms.”

In ENFI classrooms, all communication among students and teachers is through computers, making it possible to use written English as the language of instruction with and among hearing impaired students.

Dr. Batson, who started ENFI a year ago, said that while ENFI was designed to improve students' English language skills and consequently improve their coursework, another result of using the network is that teachers and students in a mainstream setting can communicate effectively. Also, new teachers and students at Gallaudet can use computers to communicate directly while they are learning sign language, he said.

Four departments on campus now using ENFI include English, Foreign Languages (German), Mathematics and Business Administration (Computer Information Systems). The system is also used at the Northwest Campus.

“ENFI is also valuable for increasing the visibility of Gallaudet and for use as a recruitment strategy,” said Dr. Batson. That helps explain the support the project has received from the College administration, College of Arts and Sciences and the College of Continuing Education, as well as from the English Department, he added.

Response to information about the network distributed to schools across the country has been “enthusiastic,” said Dr. Batson. He has traveled to a number of areas across the country and Canada for ENFI presentations and workshops.

Among the schools he visited were California State University at Northridge, Ohlone College and Seattle Central Community College.

The Gallaudet regional center at Ohlone College established an ENFI network in March. “The goal for '87 is to set up network systems at each of

the regional centers and at other schools where deaf students are enrolled,” Dr. Batson said.

Off campus, ENFI is called the Gallaudet Classroom Network so that it may be strongly identified with the College, said Dr. Batson.

“The climate is right for expansion of the project. Too many mainstreamed hearing impaired students are isolated in classrooms where communication with teachers and classmates is difficult. Computers help to minimize this problem.”

“Considering the problems that hearing impaired students have finding jobs in a society where they are judged not only for what they can do but how they communicate, especially in written English, the ENFI system may be a godsend,” said Dr. Batson.

A monthly newsletter, *EnfiLOG*, is being sent to interested people in educational fields worldwide. For more information on ENFI, call x5315 (V) or x5717 (V/TDD).

## Complete Gallaudet College spring sports schedule

### Track and Field

Head Coach: Jack Mika

<b>March</b>				
29	William-Mary College Quadrangular	A	TBA	
<b>April</b>				
5	Christopher Newport Invitational	A	TBA	
9	Bridgewater/Eastern Md. College	A	2:30	
12	Messiah College Invitational	A	11:30	
15	Catholic Univ./Univ. of Md.-Baltimore	A	3:30	
16	Newport News/Mont. College-Rockville	H	3:00	
19	Mason-Dixon Relays	A	TBA	
26	Mt. St. Mary's Invitational	A	TBA	
30	York (men only)	H	3:00	
<b>May</b>				
2-3	Mason Dixon Championship	A	TBA	

### Men's Baseball

Head Coach: Vance Rewolinski

<b>March</b>				
19	Eastern Mennonite	H	2:00	
21	Univ. of Scranton	H	1:00	
<b>April</b>				
2	Shenandoah	A	3:30	
8	St. Mary's	A	1:00	
12	Virginia State Union	H	1:00	

The Student Union and Office of Student Development will co-sponsor a “May Festival” on May 9 in Ely Center. Among events planned are a picnic and crafts bazaar. Members of the campus community are invited to participate in the bazaar. The fee is \$2.50. Application forms are available from the information desk in Ely Center. The deadline for applications is April 18. For more information contact Hillel Goldberg, Student Union Office x5182.

Cabaret, 4th Edition, will be held April 18 and 19 in the Alumni House beginning at 7 p.m. There will be a cash bar and hors d'oeuvres will be served. Entertainment will be provided by Debbie Rodgers, a member of the “Talking Hands” troupe. Admission is \$10. Checks payable to the Alumni House General Fund should be sent to Mike Kaika, Alumni House.

The Gallaudet Spring Workout program is half over. Walk-in classes are held daily at noon, Monday through Thursday after work, Friday evenings and Saturday mornings. The fee is \$3 per class. For more information, call x5365.

The Gallaudet College Alumni Association (GCAA) invites the campus community to the 122nd anniversary celebration of the signing of Gallaudet's charter on April 12. The day-long program includes a one-woman art show by Ruth Rinker Peterson and a seminar on “Retirement Planning” presented by Al Sonnenstrahl. Also planned are a cocktail hour at “Ole Jim” followed by dinner at which Gerald Burstein, president of GCAA, will be the guest

speaker. Tickets are \$15 per person. Checks should be made payable to GCAA and sent to Polly Peikoff, Alumni House, by March 28.

Hearing impaired faculty and staff are welcome to participate in the following off-campus events for which interpreters are provided: “Adams-Morgan Walking Tour,” March 22, 3 p.m. beginning at All Souls Unitarian Church at 16th and Harvard Sts. NW; and “The Art of the Japanese Garden,” March 26, 8 p.m. at the National Museum of American History. For more information on both events call 357-1696 (TDD). Judith Tingle also notes that an interpreter will be provided for a luncheon and panel discussion on “The Promotable Woman,” beginning at noon April 2 in the Park Terrace Hotel (\$15; call 393-5257 for reservations).

The next interpreted storytelling program at the Martin Luther King Library in D.C. will be April 12 at 11 a.m. All deaf children and their parents are welcome. Deaf storytellers are encouraged to come and participate. On the previous Monday, April 7, Gilbert Eastman will lead a “Salute to Laurent Clerc” at the North County Branch Library in Glen Burnie, Md. beginning at 7 p.m.

### OTG takes a break

*On the Green* will not be published next week, March 24, because of spring break. The annual special April Fools' issue will be published the following week. Therefore, the next regular issue of *On the Green* will be April 7.

### Men's Tennis

Head Coach: John Harrell

5	Wilson	H	3:30	

## KDES boys win middle school title

KDES hosted and won the first annual Potomac Valley Athletic Conference Middle School Basketball Tournament March 1-2.

The event is an extension of the Potomac Valley Conference which, until this year, conducted athletic tournaments only for high school sports. KDES was eligible for membership in the conference because it serves as a middle school for MSSD.

The boy's team, coached by Billy Lange, downed Hebrew Academy and Jewish Day School before defeating St. Andrews in overtime to capture the title.

The girls' team, coached by Nancy Moore, finished fourth.

Lange and Moore are Gallaudet undergraduates.

John Parker, director of athletics for PreCollege Programs, coordinated the tournament. "KDES staff and students did a splendid job as hosts as well as participants," he said.

## Sponsored R&D

The Office of Sponsored Programs is pleased to announce that the College recently submitted 16 preliminary proposals to the Fund for the Improvement of Postsecondary Education.

The proposals came from personnel in many departments, with multiple applicants from Preparatory Studies, English, Biology, Audiology, Linguistics and IDEC. The funding requests totaled more than \$2.5 million.

Applicants will be notified by April 25 if selected to submit final proposals. For more details, including applicant names and project titles, please see the next issue of the OSP Bulletin.

Provided below are application deadlines of selected programs that offer potential grant or contract opportunities for faculty, staff and graduate students. More details on these and other programs of interest can be obtained from the Office of Sponsored Programs, x5033 (V/TDD).

Deadline	Program
3/21/86	NEH: Humanities Projects in Media Program
3/21/86	ED/OSERS: Auxiliary Activities; Innovative Programs for Severely Handicapped Children (Deaf-Blind)
4/4/86	ED: Improving Instructional Software for Use with Handicapped Students
5/2/86	NSF: Teacher Preparation Program for Teachers of Science, Mathematics, Technology
5/15/86	NSF: Program Solicitation for Elementary School Science Instruction (preliminary proposals required—allow 2-3 weeks for responses)
7/15/86	NSF: Sensory Physiology and Perception Program

**Enjoy  
Spring  
Break**

African Student Union president Larry Musa of Nigeria, left, shows a film on African culture to visitors at the International Fair held last month in the Ely Center. Approximately 100 international students representing 40 countries prepared educational exhibits, videotapes, arts, crafts and cuisine related to their various cultures.

## Resource centers provide assistance to schools & programs across country

The Educational Resource Centers on Deafness, formerly the Pre-College Outreach Affiliated Schools Program, has arranged a variety of activities across the country recently, some of them in conjunction with the Kellogg Special Schools of the Future project. The following is a summary.

Cindy Puthoff and Karen Olson, English teachers at MSSD, presented a reading and writing workshop for teachers at the Atlanta Area School for the Deaf in Georgia. Puthoff and Martha Manson, a language resource teacher at KDES, presented a reading and writing workshop for teachers of hearing impaired students at the South Carolina School for the Deaf.

Ingrid Willenz Isaacs and Jackie Mendelsohn, both counselors, met with supervisors of programs for hearing impaired students in Ohio. They provided an overview of educational needs as part of planning efforts for a statewide training program for teachers.

At the same conference, sponsored by the Ohio Regional Centers for Low Incidence and Severely Handicapped, Judy Berglund, a career development specialist at MSSD, and Susan Zylstra Owner, supervisor of the Special Opportunities Program at KDES, met with supervisors on the topic of prevocational and vocational evaluation of hearing impaired students.

Debra Nussbaum, an audiologist, Bettie Waddy-Smith, a speech therapist, and Julia Stovall, a planning specialist, presented an "Orientation to Deafness" workshop at the Lake Anne School in Reston, Va.

Jean Slobodzian, a primary teacher, conducted a reading workshop for elementary school teachers at the West Virginia School for the Deaf in Romney, W. Va.

Jo Israelson, a planning specialist at Pre-College Outreach, met with members of the Support Services Team from the Columbus (Ohio) Hearing Impaired Program (CHIP) to complete evaluation of the team's functioning and develop a plan for the remainder of the year. In addition, she met with the entire school staff to evaluate the implementation of the CHIP language curriculum.

Israelson also conducted a needs assessment at the Margaret Sterck School for the Hearing Impaired in Newark, Del., where she also

presented a workshop on teaming to the resident advisers.

Dr. Gerilee Gustason, professor of education, and Dennis Davino, a special assignment instructor, presented workshops on combining ASL and MCE in the classroom and on the role of the educational interpreter to participants at the Maryland School for the Deaf in Frederick, the Atlanta Area School for the Deaf in Georgia, and the Oregon State School for the Deaf in Salem. The workshops were conducted as part of a six-workshop series sponsored by Gallaudet's Department of Education, Pre-College Programs and the College for Continuing Education.

Lita Aldridge, parent education coordinator for Outreach, attended the March 8-9 convention of California Teachers of the Hearing Impaired (CATHI) in Oakland, Calif. Her presentation was entitled "Building Bridges with Families."

Aldridge also visited the California School for the Deaf in Riverside for consultations with the outreach and parent education staff, and the Tripod Montessori Preschool for deaf youngsters for a speech on Parents Day.

## 10 visitors attend weekend seminar

The Department of Sociology and Social Work recently held a "sleeping bag" seminar entitled "Cross Cultural Awareness in Social Work." Ten students majoring in social work at colleges and universities in the Washington D.C.-Baltimore area joined social work majors at Gallaudet for the two-day program of events.

Among the highlights of the Feb. 28-March 1 seminar were a tour of the Visitors Center; a performance of the play "The Shadow Box;" and a panel discussion on the "Diversity of the Deaf Experience."

Three of the five workshops were conducted by members of the Department of Sociology and Social Work. "Deaf Folklore" was led by Simon Carmel; "The Culture of Deaf People" by Dr. Yerker Andersson; and "Disability and Minority Policy Issues" by Dr. Sharon Barnartt.

The seminar was coordinated by Barbara Pollard, assistant professor and field instruction coordinator for the Department of Sociology and Social Work. According to Pollard, "This was an opportunity for a unique sharing experience for Gallaudet students and for our hearing guests—something they could not get in the classroom."

## Jobs Available

**Some of the advertised staff positions may already be filled.** For updated information, call the JOB RECORDING in the Personnel Office, x5514 or x5520 TDD.
